

Head Start Program

Annual Report 2024

Dignity Health – California Hospital Medical Center

“Health is more than not being sick; it is well-being in mind, body, and community”

California Hospital Medical Center (CHMC), a non-profit community teaching hospital, has been serving the needs of central, south, and downtown Los Angeles since 1887. As one of our city's major birthing centers, CHMC has long been considered a center of excellence in its work with pregnant women, infants and children.

In 1997, CHMC established our Head Start program, in collaboration with the University of California, Los Angeles. Located within the Hope Street Margolis Family Center and adjacent to the hospital campus, Head Start is a core component of CHMC's population health work.

Head Start provides a continuum of early care and education, health and nutrition, mental health, disabilities, and family services that support young children and their families.

The goals of Head Start are to:

- Enhance the capacity of parents and families to nurture and care for their children.
- Promote children’s overall health, development, school readiness, and academic achievement.
- Strengthen existing service delivery networks and foster community partnerships, by developing services that are accessible and responsive to the community we serve.

Service Area

California Hospital Medical Center
Head Start Program

 Hope St. Service Area

The Head Start geographic area is roughly bounded on the north by the 101 Freeway; on the east by Alameda Street; on the south by 54th Street; and on the west by the 110 Freeway to the 10 Freeway to Western Ave. to 9th St. to Hoover St. to 3rd St. and to Western Ave.

Childhood Disabilities		
Children with identified disabilities, 0-5 years	3,676	
Childcare		
Shortfall of spaces for children 0-3	4,198	

Community Needs Assessment 2023

Head Start Program Overview

Our Head Start program provides full-year home-based, center-based, family childcare, and locally designed option services for 329 low-income pregnant women and families with young children, 0-3 years of age.

We offer a continuum of program options that is responsive to the varied needs of young families. Enrollment priorities include children with special needs, children in foster care, homeless families, and teen parents.

Working in close partnership with families, our multidisciplinary team of teachers, home visitors, nurses, social workers and psychologists foster children’s development and enhance the quality of life for families, ensuring access to a comprehensive network of services, many of which are located on or adjacent to the CHMC campus.

94%

Children with up-to-date preventative oral health care

100%

Pregnant women receiving prenatal health care

100%

Children who received or are receiving medical treatment for identified conditions

School Readiness

Goals

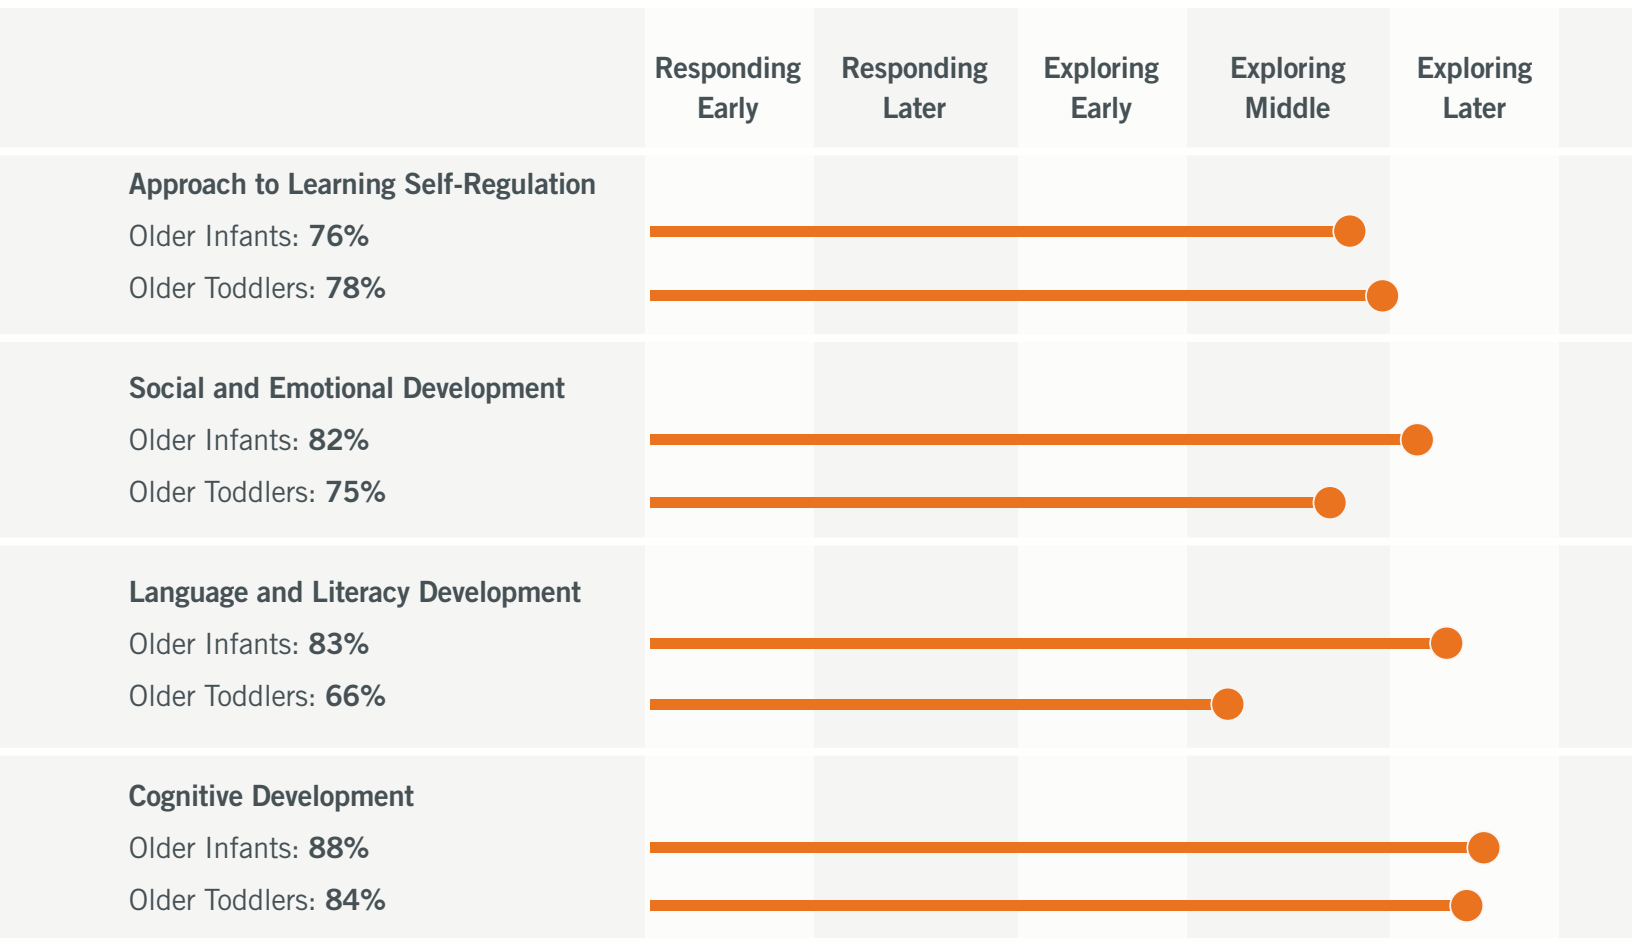

- Children will learn about themselves and their feelings
- Children will learn about others
- Children will learn about communicating
- Children will acquire thinking skills
- Children will learn about moving and doing

Our Philosophy

School readiness is rooted in the interactions and relationships that young children have with their caregivers and early environments.

Our Approach

We provide a continuum of health, mental health, family support, and early childhood education services that enriches children’s environments, promotes early development, and supports parents in their role as their child’s first teacher.

Children’s development is assessed on a quarterly basis throughout the year. Desired Results Developmental Profile (2015) quarterly mean domain subscale scores reflect age-appropriate developmental growth for children in all age groups.

Parent Involvement Opportunities

- 1 Volunteering within the Head Start program and California Hospital Medical Center
- 2 Family Literacy Classes
- 3 Socialization and Play Groups
- 4 Educational Workshops and Classes
- 5 Healthy Lifestyle Activities: Yoga and Cooking Classes
- 6 Health, Self Assessment, and Community Assessment Committees
- 7 Parent Committee and Policy Council

Parent Voices

“The program has been a big help to my children's development. As parents, we learn along with our children.”

“My child has learned so much and has become independent. I know he's in good hands and I know he is safe. This allows me to work and have peace of mind.”

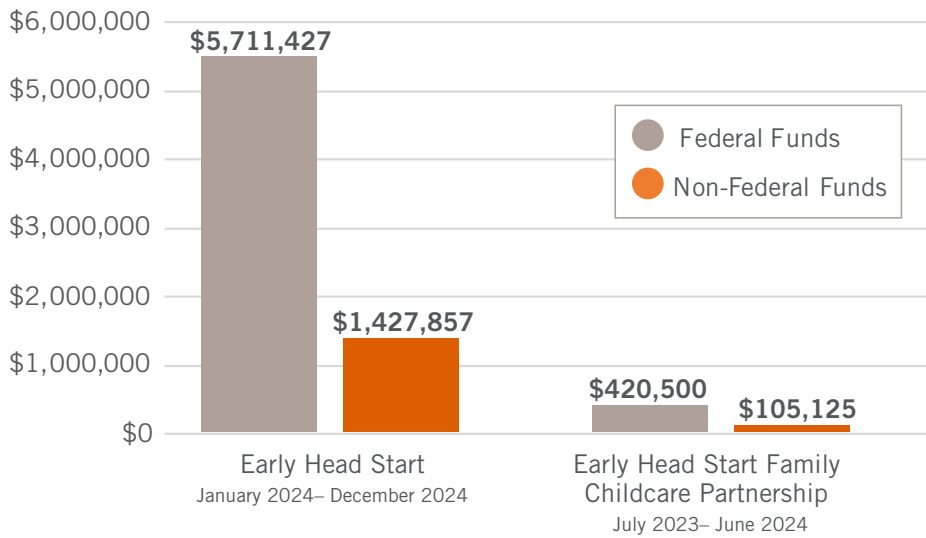

“We, as parents, feel supported. Hope Street has helped me become more involved in my child's learning and education.”

“I'm extremely thankful for the opportunities this program has provided my family. It's helped our development in many ways.”

“I wish that every parent could have the opportunity to become part of this program. It's given me confidence.”

“My child's language skills have improved and he has learned to socialize with other children.”
